

Decisyon Enriches the Industrial IoT with Launch of Decisyon 6.0

SAN FRANCISCO – December 1st 2018. In our effort to continuously improve our technology and enhance the usability of Decisyon for both partners and end users we are constantly upgrading our software with new back end and front end relevant features. The key highlights of Decisyon 6.0 include:

- UI/UX based on Google Material Design Framework
- Web Application Organizer to manage and share any content available in your application
- Advanced users and role management directly on the web app console admin section
- Kanban drag & drop task-board to manage tasks and action in a clear and easy way
- New web GUI theme customization and white labeling
- REST / JSON data source interface was added to map any third party service or API
- The Decisyon API has been extended to download API definitions and quickly import them in Postman.
- Compatibility with Java 10, PostgreSQL 9.6, Angular, Microsoft SQL
- Support to OpenID Connect as authentication layers other than LDAP, Active Directory, etc.
- Widget Designer improvements with SDK documentation and support for shared libraries.

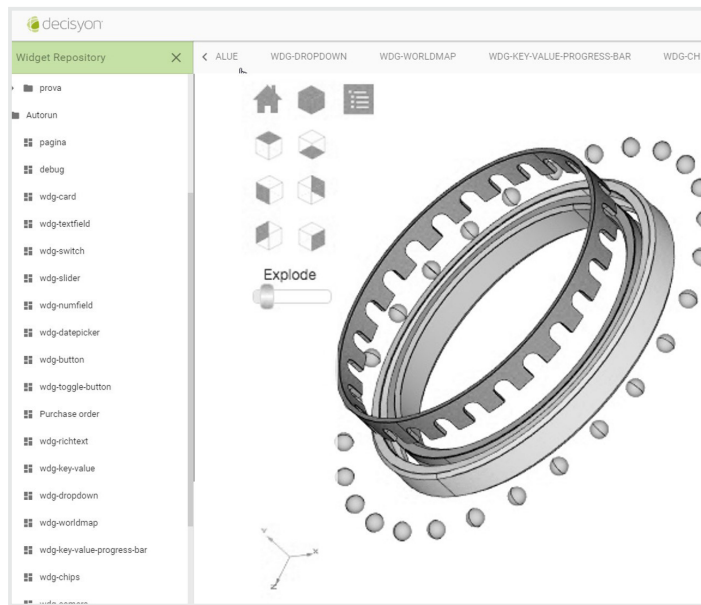

The Widget Hub is now released and allows system administrator and application developers to:

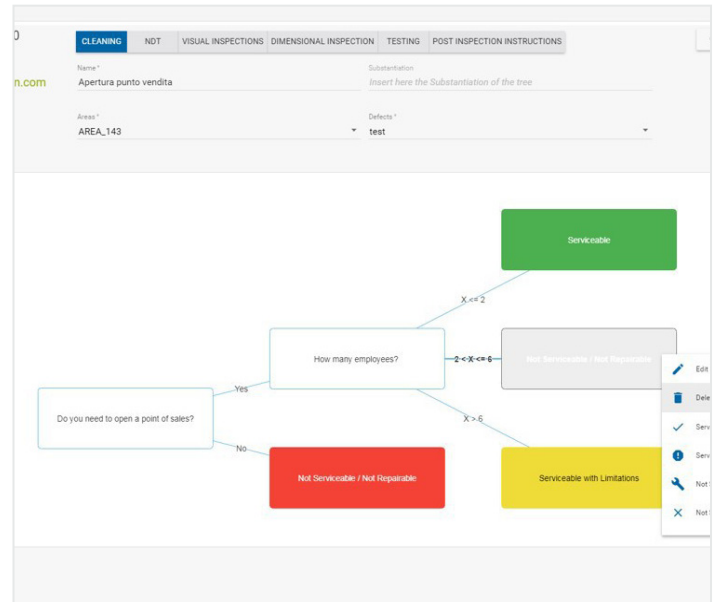

- Explore the dedicated catalog of widgets
- Read the documentation of each with details such as required data sources, in & out parameters etc.
- Easily download widgets
- Get notified about new versions
- Restore an old version of an upgraded widget
- Download widgets compatible with its own installed DAC version
- Upgrade widgets version without losing customizations

Using the Widget Hub the widget lifecycle will be separated by the App Composer lifecycle, helping you to build applications faster and use new features or bug fixing specific to widgets. Below you can see the 3 most relevant new widgets available:

About Decisyon

Decisyon enables business users to rapidly build solutions using a code-free visual software development environment. Our products accelerate your data journey from aggregation to visualization, insight, analysis and decision thru action. Decisyon offers the leading code-free visual software development environment for mission critical enterprise operations requiring real-time awareness and adaptability to their business operations and processes. We have developed and deployed many vertical solutions for the manufacturing, renewable energy, aviation, pharmaceutical, financial services, transportation and automotive industries. With built-in microservices such as data management, BI, mashboarding, rules engine, collaboration and execution, Decisyon offers a dramatic increase in speed to outcome for building and modifying vertical solutions. Decisyon's products and software solutions, ideally suited for IIoT applications running on any PaaS, are used in over 200 companies globally. Decisyon is headquartered in San Francisco, California.
